DETAILED ACTION

Drawings

1. This application has been filed with drawings which were objected to by the Draftsperson and are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

See form 948 attached.

Specification

2. The abstract of the disclosure is objected to because it is too long.
Correction is required. See MPEP § 608.01(b).

Claim Objections

3. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 5-42 been renumbered 4-41.

4. Claims 1 and 17 are objected to because of the following informalities:
Claim 1, line 23 the word "adopted" appears to be a typo of "adapted".
Claim 17, line 21 the word "adopted" appears to be a typo of "adapted".
Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. Claim 35 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Specifically, lines 5-11 appear to be a bad cut/paste combination of two claims.

6. Claims 15, 31, and 40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Specifically, the limitations a-h are confusing because existing limitations a-c are in the claims from which they depend.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-41 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-40 of U.S. Patent No.

Art Unit: 2161

The claims add the limitation "at least 2 interface gateways, ..." which would be obvious in view of the single gateway of ('603).

Prior Art Made of Record

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

EP 0 778 688 A2 to MacLean is the closest foreign art, which shows the state of the art in the utility industry, but does not disclose the invention as claimed.

Beaty is the closest non-patent art, which shows the state of the art in the utility industry, but does not disclose the invention as claimed.
